Atcom IP04 4-port Asterisk IP PBX

Product Name: Atcom IP04 4-port Asterisk IP PBX
Manufacturer: Atcom
Model Number: IP04

Availability: In stock

Please note: An understanding of both Linux and Asterisk command line is required for the successful configuration of the Atcom IP0x. VoIPon offers paid for support options for customers who experience difficulty configuring this PBX, which can be selected from the options below.

The IP04 (IP-04) is a complete Asterisk powered IP-PBX with up to four FXS/FXO modules, It is an embedded system with built-in SIP/IAX proxy server and NAT functions. It provides a solid, uniform platform for VoIP communications as well as traditional PSTN communications.
Targeted for small and medium businesses with an easy to use graphical user interface, IP04 provides an amazing value cost-saving solution on their telecommunication/data needs. With IP04, company with branch offices in different locations/countries can be easily combined together to work like a virtual single office through the internet.
The IP04 comes with no modules, it is IP only.
The IP04 is a stable, tried and tested open source IP PBX - not only is the software open-source, so is the hardware. More information can be found here .
