

3CX Phone System for Windows v6.0

Break free with a software-based IP PBX for Windows

Break free from proprietary phone systems and move up to an open standard IP PBX that increases productivity of employees and IT staff and costs much less. Evolve your communications by enabling employee mobility: Calls can be made and answered seamlessly from outside the office and voice mail and faxes received via email. Globalize your business by connecting branch offices and re-directing local customer service numbers via the internet to your phone system at negligible cost.

How it works

A complete 3CX Phone System for Windows consists of the server software, soft phones or SIP hardware phones, and a VOIP Gateway to connect your existing phone lines. A VOIP provider can be used to leverage low cost calls across your user network. The system can use the existing computer wiring (and share the network point with the computer) and can be installed on an existing, non-dedicated Windows server (no need for Linux!) or run as a virtual machine.

10 reasons to switch to a SIP based IP PBX for Windows:

1. **Increase Mobility:** allow teleworking and improve productivity
2. **Eliminate costly telephone tag** using the inbuilt presence feature
3. **Easier installation, management, adds and moves** saves IT staff time
4. **Windows-based, no need to learn Linux, and integrates with your network/ applications**
5. **Increase employees' productivity with CRM & ERP integration**
6. **Deliver fax and voice mail directly to users inbox**
7. **Users can manage their phone via Windows** requiring less

Say goodbye to expensive, proprietary, phone system expansion modules and costly phone bills!

An open, vendor-independent system that grows with your business and improves your bottom line

3CX Phone System for Windows is an award-winning IP PBX that completely replaces your proprietary PBX, supports standard SIP soft/hard phones from any vendor, VOIP service providers and traditional PSTN phone lines. Add extensions or lines by adding standard SIP telephony equipment and save on consultants' fees because of 3CX' easy to use web-based administration.

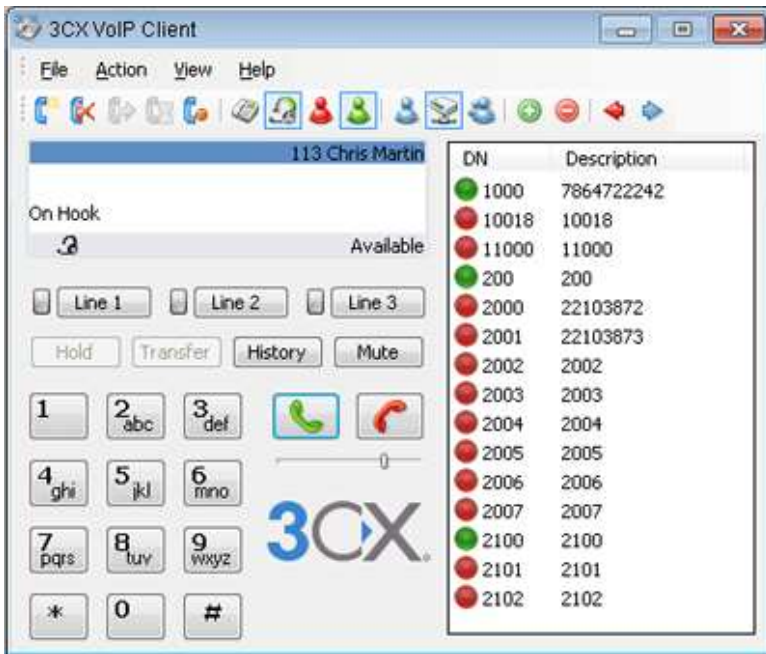

Overcome the limitations of outmoded hardware-based PBX systems, reduce costs significantly and add advanced communications features that will make your employees more productive and your company more efficient and competitive.

Key Features of 3CX Phone System for Windows

3CX VOIP Client eases call management and boosts mobility

3CX Phone System includes a compact VOIP Client which makes using the phone system a breeze. It can be used in combination with a headset, as a fully functioning SIP software phone, or in combination with a SIP hardware phone. Users have the flexibility to use 3CX VOIP Client both in or outside the office, enhancing their mobility. Calls can be placed, received or transferred directly from the users' Windows desk top. Call forwarding, Follow me, No answer and other options can be set with a few mouse-clicks. In addition, the 3CX VOIP Client displays a complete call history, including missed and placed calls, and allows users to easily place a call without having to dial the number again.

Set Presence and eliminate phone tag

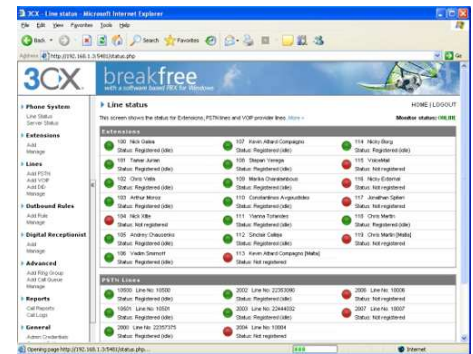

Users can see the extension status of other users at a glance from the 3CX VOIP Client, avoiding expensive phone tag. A report from Sage Research shows that too many hours are wasted each week by employees forced to play phone tag. With 3CX, users can quickly view other users' status, set their own call status and avoid unnecessary calls or transfers.

Launch calls directly from Microsoft Outlook / CRM packages

Calls can be launched directly from Microsoft Outlook or popular web based CRM packages such as Salesforce.com. Just click on a contact to automatically dial the number and optionally log the call. Forget about dialing phone numbers again!

Mini VPN makes connecting remote users and offices a breeze

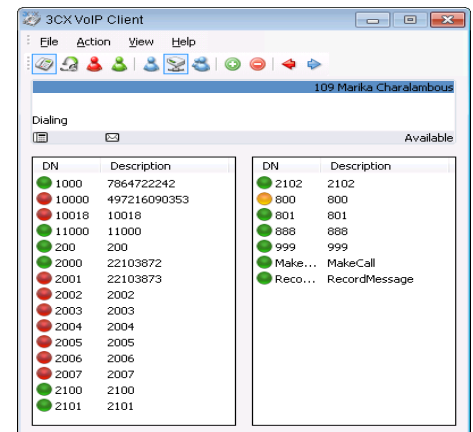

3CX Phone System allows seamless connection of remote users and branch offices without firewall reconfiguration. All voice traffic is tunneled securely via the in-built VPN over a configurable network port, making integration of remote branch offices and remote employees easier than ever.

Manage your phone system from anywhere on the network via a web browser

Configure your own extension with the My-phone self-service portal

3CX VOIP Client allows easy call management with a few mouse clicks

Automatically provision SIP hardware phones: Easy setup of new extensions, central phonebook and BLF

Seamless support of popular VOIP Gateways and SIP Phones

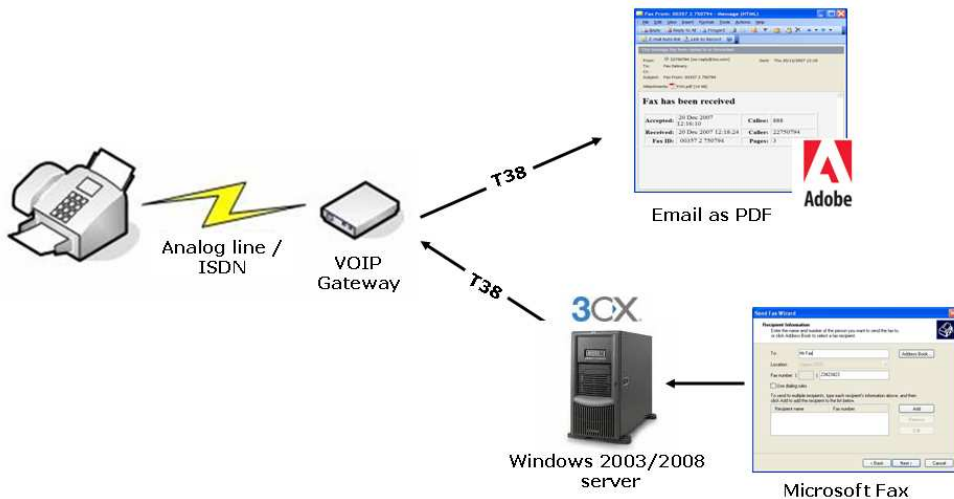

3CX Phone System seamlessly supports VOIP Gateways and SIP Phones from leading SIP manufacturers such as Grandstream, Patton, Aastra, Linksys, Vegastream and others. These can be automatically configured from within 3CX Phone System.

Works with leading VOIP providers

3CX Phone System has been certified for use with leading VOIP providers such as Nexvortex, Broadvox and Inphonex. The Small Business, Pro and Enterprise editions of 3CX Phone system include the G729 codec allowing you to save bandwidth.

Integrated Fax server: Send faxes with MS Windows Fax - **NEW**

3CX Phone System can send faxes using the popular Microsoft Windows Fax feature, seamlessly integrated with MS Office.

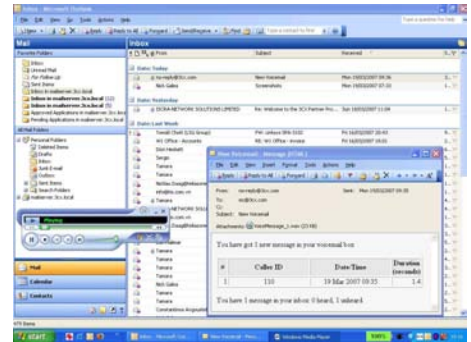

It can also receive faxes via the T38 protocol, convert them to PDF files and forward them by e-mail. Furthermore, you can configure any line or any DID to go to a different e-mail address – time has come to get rid of that old fax server software and fax hardware!

3CX Phone System for Windows available in 4 Editions

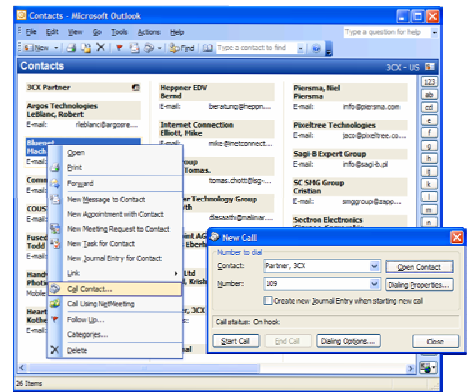

Free, Small Business, Pro and Enterprise Edition

3CX Phone System is available in four editions, all supporting an unlimited number of extensions. The Free edition is limited to 8 simultaneous calls, whereas the commercial editions can be extended beyond that and have a more extensive feature set. The Small Business version supports up to 8, the Pro version up to 16 and the Enterprise edition supports up to 32 simultaneous calls.

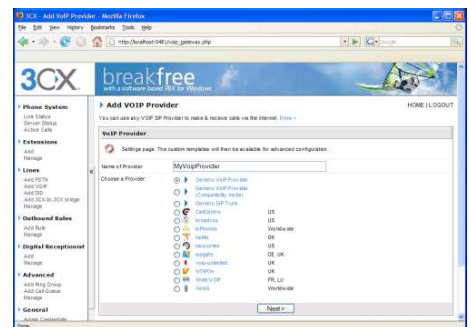

Call capacity can be expanded with upgrade packs.

Unified communications: Receive your voice mail and fax messages in your email inbox

Initiate phone calls directly from MS Outlook or Salesforce.com and other popular CRM packages

Save costs on long distance calls by using leading VOIP providers

Continue to make and receive calls on your existing telephone lines using a VOIP gateway

Extensive, enterprise level, feature set

Now you can meet the most difficult of communication challenges with enterprise level features - and at a purchase cost dramatically lower than a traditional PBX:

- Call recording – Easily record calls for monitoring purposes - **NEW**
- Phone provisioning – Set-up new extensions, central company phone book, MWI and BLF automatically - **NEW**
- Call conferencing – Set-up free ad hoc conference calls - **NEW**
- Paging and Intercom – Page groups of users to broadcast a message or call a single user via intercom - **NEW**
- Windows 2008 support - Run a PBX virtualized - **NEW**
- Easy phone system management via Web-based configuration
- Reduce inter-office communication costs using 3CX bridges
- Unified messaging - Allow users to receive voice mail and fax via e-mail. This works with any SMTP mail server
- Unlimited Auto Attendant menus (e.g. 1 for sales, 2 for support etc.)
- Support for standard SIP phones - Eliminate expensive proprietary system phones
- Call queuing - Queue calls for answering by a group of agents and monitor them via 3CX VOIP Client
- Connect to Enterprise CRM & ERP applications
- Use any WAV file for professional music when on hold
- Call Park
- Call Pickup
- Supports Message Waiting Indicator on SIP phones
- Supports Exchange 2007 Unified Messaging Server
- Works with SIP trunking VOIP providers
- 3CX Tunnel for easy remote connections

System Requirements

- Windows 2000, XP, 2003 Server, 2008 Server or Vista
- Minimum 1 GHZ and 512 megabyte of ram
- SIP based software or hardware phones
- To connect PSTN lines, a SIP-based VOIP Gateway is required
