## GRANDSTREAM ANNOUNCES WIRELESS USB ADAPTER FOR THE GXV3140

**Broadsoft Connections, Scottsdale, AZ (October 27, 2009)**— Grandstream Networks, the leading manufacturer of IP voice/video telephony and video surveillance solutions is pleased to announce a wireless (802.11b/g/n) USB adapter to the GXV3140 IP multimedia phone enabling the device to connect seamlessly to surrounding wireless networks. The new WiFi USB adapter fully complies with the latest 802.11n standard as well as legacy 802.11b/g standard. It supports low power management, and various security standards such as WEP 64/128, WPA (PSK), WPA2 (PSK), TKIP, and AES.

The wireless adapter can be plugged into the GXV3140 via the USB port located on the right hand side of the phone for connection speeds of over 150Mbps. Now GXV3140 users can have video call for FREE with IPvideoTalk™ wherever there is an available WiFi network. Business travelers can use the phone to conduct video conference with clients anywhere they can find WiFi connection to Internet on the road and residential users can stay connected with friends and families through video chat anywhere in their home where there is WiFi coverage from their home wireless router.

Says David Li, CEO of Grandstream Networks, “We believe that the wireless USB adapter builds greater flexibility and portability to the GXV3140. Now users don’t have to worry about location or wiring restriction of an Internet connection to enjoy the rich features of the device.”

The GXV3140 is a next generation IP multimedia phone that splendidly blends state-of-the-art real time video telephony capability with a number of popular web and social networking applications. It features an advanced 1.3M pixel tilt capable CMOS camera (with privacy shutter), a 4.3” 480x272 digital color LCD, dual Ethernet ports, SD & USB, a stereo headset jack, TV-out, stereo audio-out, and a full duplex speakerphone. It supports a full web browser, thousands of internet radio stations, popular online music networks such as Last.fm, IM with Yahoo/MSN/Google, Yahoo Flickr/Photobucket/Phanfare web photo albums, personalized RSS feeds of news/weather/stock/currencies, calendar, alarm clock, smart localization in 9 languages. It will soon support Youtube, Facebook, Twitter, horoscopes, and 3-way video conference.

Grandstream’s wireless adapter will be available in November 2009 for a list price of \$35 through Grandstream’s distribution channel.
