

Epygi Quadro 2xi

Product Name: Epygi Quadro 2xi

Manufacturer: -

Model Number: -

Please note that this product has been discontinued. For an alternative we recommend the Epygi IP PBX selection

The Quadro2xi is an as fully-featured IP PBX for home offices and teleworkers as the Quadro2x is. The important difference: Quadro2xi offers you an ISDN line instead of FXO and connects you via two B-channels of 64 kbit/s each to the digital PSTN. A 10Base-T Ethernet line provides access to the Internet. Altogether, two standard phones and two fully featured LAN IP phones (SIP/MGCP) may be attached. Up to 24 additional virtual extension allow e.g., registering at various SIP servers. In addition, all extensions assigned to the ISDN line may be mirrored and act as remote IP extensions. Wherever you are, calls will reach you, and you will be able to make calls as if you were at your home office. Fully-Featured IP PBX The Quadro2xi offers the same multitude of features as the Quadro2x: extensive PBX functionality, integrated voicemail, cost saving call routing functionality, IP routing, SIP and H.323 call signaling and much more. Integrated Internet Access Router The Quadro2xi IP PBX embodies a fully-fledged Internet access router with firewall security, including IDS, NAT, policy and service based filtering as well as stateful inspection. An extensive IPSec VPN functionality with DES and 3DES encryption makes an additional contribution to data security. VoIP Carriers The Quadro2xi IP PBX is easily applicable for VoIP Carriers as well as small businesses. For VoIP carriers, a special wizard has been implemented that facilitates the configuration of Quadro2xi to work according to individual requirements.
