Availability: In stock

Valcom VIP-411-DS-IC Wall Speaker

The Valcom VIP-411-DS-IC Wall Speaker is a one-way SIP wall speaker in an angular mount with a 5 character digital clock. This model is meant for use with the InformaCast IP paging software. The VIP-411-DS IP Talkback Wall Speaker with Digital Clock enables two-way handsfree voice access to a single location over an IP-based network. This allows a page zone extension anywhere on the network. The speaker audio level is electronically adjusted via software. Clock synchronization is acquired from a Network Time Protocol (NTP) server, either a private internal server or from the Internet. A call switch input is provided for call initiation. The enclosure is made of steel with a durable gray powder coated finish and features an angled design to direct sound downward. The color of the enclosure can easily be changed to match any decor. A detachable black cloth grille is included. Power is provided to the VIP-411-DS via a Power over Ethernet (PoE) switch meeting the 802.3af specification.

Valcom VIP-411-DS-IC Features:

- 1 PoE (802.3af) - No Local Power Required
