CloudTC Glass 1000 Android VoIP Phone

ï¿½ Smart UI For Powerful Call Management The elegantly simple and smart user interface of the CloudTC Glass 1000 IP Phone provides easy access to advanced telephony features and business-focused applications. From looking up a contact, to conference calling, to browsing in the applications store, with Glass it's just one touch away.
ï¿½ Rich Experience with HD Audio The Glass 1000 IP Android Phone offers superior audio quality. It utilizes wideband speech codecs, which sample audio at 16 KHz instead of the standard 8 KHz, thus doubling the bandwidth for communications and signiﬁcantly elevating voice quality. Combine HD audio with Glass' acoustically tuned housing, and the end result is industry-leading speakerphone clarity.
ï¿½ Business Apps you wantOne of the key feature of the Glass Smart VoIP Phone is the ability for business users and third-party developers to add their own applications, either through company IT departments or by downloading from the thousands of available Android apps. Glass takes it a step further by offering the CloudTC App Market to download business-focused apps, the ones you actually want on your desk phone.
ï¿½ Simple Deployments It has never been easier to deploy a SIP based VoIP phone than with Glass. From the initial set up and conﬁguration to auto provisioning, Glass is designed to save your business time and money. With dual sensing switched Ethernet ports, your company can avoid additional wiring costs and leverage existing bandwidth to start taking greater advantage of your on premise or hosted VoIP services.
