Sangoma FreePBX Asterisk Cards expansion

ï¿½ For Analog Ports - We recommend Sangoma Analog Cards.
ï¿½ For Digital Ports - We recommend Sangoma PRI Cards.

From its initial introduction in 2004, when it contained only four database tables of configuration files for Asterisk, FreePBX has grown to encompass more than 219,000 lines of code and hundreds of tables. The FreePBX project now provides an entire open source platform and communications ecosystem that can not only ease installation by providing confi guration files for Asterisk, but also provide support and ongoing updates to the entire system. Its ability to work in the cloud or on site lets you maximize fl exibility while providing you the ideal PBX solution.

Did you know when you purchase Sangoma IP Phones in conjunction with FreePBX you also unlock free modules for FreePBX?Endpoint ManagerThis directly auto provisions upto 150 popular desk phones, gateways and other hardware.UCP for EPMEasily update soft keys functions (such as quick dial) directly from the FreePBX web Control panel.Phone AppsApps include Do Not Disturb, Voicemail, Conference rooms and much more.

Additional Hardware

ï¿½
In addition to the FreePBX software and appliances, there are a number of hardware options that can help you optimize your PBX solution. Sangoma provides a full line of products for your business to create a fully-functioning VoIP communications system.

Telephony Cards

ï¿½ Sangoma’s wide range of digital, analog, and data telephony cards have been engineered and used in Asterisk® solutions from the very beginning, and have become the standard by which other interface cards have been measured. Equally adept at handling the call density of the office or the call center, these premium telephony cards offer peerless clarity and reliability.

VoIP Gateways

ï¿½ The Vega Enterprise series features both FXS and FXO ports for PBX or PSTN solutions, providing resilient, upgradable, and fault-tolerant support for IP conversion. The NetBorder series offers a set of cost-effective all-in-one turnkey solutions that contain powerful transcoding capabilities and can support up to 256 lines simultaneously.

Session Border Controllers

ï¿½ Carrier-quality enterprise session border controllers that provide reliable VoIP security for a wide range of enterprises, from the small business to the large corporation, the Vega SBCs can handle up to 500 sessions simultaneously, providing a secure connection point for SIP trunking, along with the fl exibility, redundancy, and durability of a VM-ready solution.
