

Cyberoan NG

Future-ready Security for SME networks

CR300iNG

Cyberoam NG series of Unified Threat Management appliances are the Next-Generation network security appliances that include UTM security features along with performance required for future networks. The NG series for SMEs are the "fastest UTMs" made for this segment. The best-in-class hardware along with software to match, enables the NG series to offer unmatched throughput speeds, compared to any other UTM appliance in this market segment. This assures support for future IT trends in organizations like high-speed Internet and rising number of devices in organizations offering future-ready security to SMEs.

With Cyberoam NG series, businesses get assured Security, Connectivity and Productivity. The Laver 8 Technology treats User-Identity as the 8th Laver or the HUMAN layer in the protocol stack. It attaches User-Identity to security, which adds speed to an organization's security by offering instant visibility into the source of attacks by username rather than only IP address. Cyberoam's Extensible Security Architecture (ESA) supports feature enhancements that can be developed rapidly and deployed with minimum efforts, offering future-ready security to organizations.

Bandwidth Management

- Access time restriction - Time and Data Quota restriction

- Parent Proxy support with FQDN - "IPv6 Ready" Gold Logo

*Antivirus, IPS and UTM performance is measured based on HTTP traffic as per RFC 3511 guidelines. Actual performance may vary depending on the real network traffic environments.

- Application and User Identity based Bandwidth

-Application and User Identity based Traffic Discovery -Application and User Identity based Traffic Discovery -Multi WAN bandwidth reporting - Category-based bandwidth restriction

- Schedule-based Committed and Burstable Bandwidth - Schedule-based P2P and IM Controls

Failover - Automated Failover/Failback, Multi-WAN failover, 3GModem failover
 WRR based load balancing

- WRK based local braining
 - Policy routing based on Application and User
 - IP Address Assignment - Static, PPPoE, L2TP, PPTP & DDNS Client, Proxy ARP, DHCP server, DHCP relay

- Support for HTTP Proxy - Dynamic Routing: RIP v1 and v2, OSPF, BGP, Multicast
