Future-ready Security with Wi-Fi Access Point for SOHO/ROBO networks

CR35wiNG is the Next-Generation Unified Threat Management appliance with Wi-Fi access points that offer "the fastest UTMs made for SMBs" to small offices with high performance security over WLAN. CR35wiNG appliances come with 3x3 MIMO technology that greatly enhances wireless range and performance . It supports 802.11a/b/g/n wireless standards. Combined with security over wired networks offered by its range of UTM appliances, Cyberoam enables organizations to overcome the physical limitations of securely accessing network resources and offers more user flexibility, user productivity and lower network ownership costs.

The best-in-class hardware along with software to match, enables the NG series to offer unmatched throughput speeds, compared to any other UTM appliance in this market segment. This assures support for future IT trends in organizations like high-speed Internet and rising number of devices in organizations offering future-ready security for small office networks.

Cyberoam's Layer 8 technology that treats user-identity as the 8th Layer or the HUMAN layer in the protocol stack, works even in WLAN environments, to allow Identity-based security policies in dynamic IP environment.

The 'Next-Generation' UTM Series for SOHO:

Faster performance, broader coverage with 3x3 MIMO Technology

> Cyberoam's Layer 8 Technology treats "User Identity" as the 8th Layer in the protocol stack

Cyberoam UTM offers security across Layer 2-Layer 8 using Identity-based policies

Cyberoam UTM features assure Security, Connectivity, Productivity
