OMNISOUND® HD – SUPERIOR AUDIO QUALITY

The patented OmniSound® audio technology guarantees an impressive and crystal-clear full-duplex audio in both directions for effective participation in virtual meetings. The sound is transmitted clearly and powerfully to all attendees thanks to a hypersensitive microphone with 360° audio pick-up and speakers.

OmniSound® HD delivers **HD audio** during VoIP calls. It also incorporates **automatic echo cancellation** and **noise suppression**, which minimises background noise interference, and an **equaliser** for personal adaptation of the audio properties.

This means you can move about freely in the room, talking, discussing and debating with others without any loss of audio quality and without any annoying sound clipping, damping or echoes. It's as close to real sound as you can get.
