- Integrated fax server
- Automatic phone provisioning for Gigaset devices
- One-number concept - be reached anywhere at any time via one number
- Up to 20 simultaneous calls

Optimising Communication Processes.

The Gigaset T440 PRO can considerably simplify your communication process. A simple management as well as integration of presence information gives you a quick overview of your employees' status and availability. The same information can be displayed through busy lamp fields on the Gigaset desktop devices. Playing phone tag will be history.

Great customer service.

With flexible user groups and overflow functions you can make sure that your sales team, marketing and support stay perfectly connected while delivering high quality customer service. With the T440 PRO, busy signals and long waiting queues are a thing of the past.

Easy setup and administration.

For an easy installation the Gigaset T440 PRO has a built-in setup wizard. New phones and users can be added within minutes without any manual effort. With the highly intuitive web-based interface and support for standard protocols, configuring the T440 PRO is simple and quick.

Because it's your business

Gigaset T440 PRO

Efficient and reliable communication for small companies

T440 PRO – a strong team player.

The complete Gigaset PRO SIP desktop as well as IP DECT product portfolio can easily be integrated through auto provisioning. Once connected Gigaset PRO phones or DECT based stations are automatically configured, saving the installer valuable time. It is that simple. With our award winning DECT solution, users can make sure they are always available, not matter where they are in the office. And with our stylish and feature rich SIP desktop phone portfolio, users can choose between different devices that are perfectly suited for their needs. All part of a Gigaset PRO single-source solution.

Highly intuitive user interface for ultimate convenience.

The user interface is fast, auto-scalable and user friendly. It recognizes which screen size you use; from mobile, to tablet to large laptop or desktop screens. The home screen allows for fast access to the most-used features and can be set, upon request, for every users' individual needs. The system can appear in the language and profile settings of your choice. Voicemails, call lists and even call diversion is available is available right from your desktop screen. Calls on your desktop phone can be initiated right from the user interface, simply by mouse click.

Intelligent call handling.

The Gigaset communication platform can intelligently route incoming calls automatically to the right person or group of persons. Employees have access to a customizable voice response system where callers get presented with a choice of call destinations, e.g. "Press 1 for Sales or press 2 for Customer Support". To professionally present your business to your customers, the system is also equipped with a waiting queue, supporting music-on-hold which is customizable via your personal web UI.

Smart Migration Concept.

The Gigaset T440 PRO have built in TDM ports (analogue trunks, ISDN BRI and analogue extensions e.g. fax). At the same time the systems are fully VoIP enabled and support all Gigaset SIP and SIP DECT products incl. auto provisioning. Built on future-proof technologies the T440 PRO is a secure investment into the future, ideally suited for customers who want to use their existing infrastructure today while taking advantage of VoIP technology at the same time.
