eartec

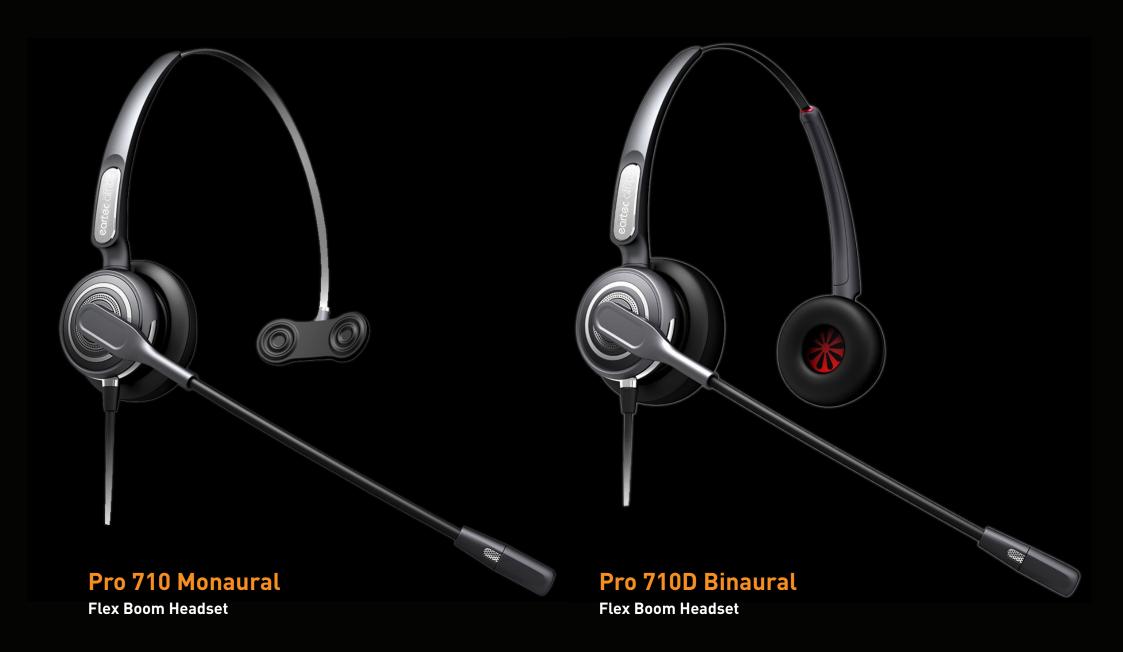

Discover the revolutionary innovation of sound

eartec is a new brand of business and call-center headsets created by an innovative team that boasts an in depth knowledge of the headset communication industry.

Whether you are working in a quiet office or intensive busy call centre, users can be assured eartec headsets are accommodating to any office environment.

From protecting your hearing and posture to ensuring clear communication, eartec headsets are the ultimate choice in maintaining productivity levels even in the most demanding of day to day business.

Pro 700 Series Headsets

The essential tool for all day comfort and improved performance

Acoustic Shock Protection	Sound protection balancing technology ensures all day comfort.
Hearing Protection	Sound output is limited < 118db in accordance with related regulations.
Ear Cushion	Soft leatherette for added comfort.
Buffer Pad	Buffer pad to alleviate tension that may be caused by long hours of wear.
T-Bar	Using twin injection moulding, inner side has a soft padding for comfort whilst the outer is hard set to give rigidity to the headband and prevent slippage when worn.
Speaker	Quality Danish designed speakers with Neodymium magnet system for accurate sound reproduction and audio balance.
Headband	Top quality steel with high elasticity and slow rebound characteristics. Comfortable & durable.
Sound Quality	High fidelity quality enables users to keep volume levels low yet hear clearly. Further aiding hearing protection.

EAR 710 Technical Specifications

Model	EAR 710
Colour	Obsidian Black
Connection	Quick disconnect cord
Ear cushion	Premium Leatherette with buffer pad
Microphone	Cardioid directional, noise cancelling microphone
Noise - cancelling function	Two tier noise cancelling system with ambient noise filter
Speaker	A highly sensitive neodymium magnet system for accurate sound reproduction and audio balance
