Most peoples’ interaction with PCs is text-based such as email and instant messaging, but human voice is still the most natural way of communicating. Advances in speech recognition technologies and the ubiquity of fixed and mobile telephones now opens up a new world of opportunities for voice based systems.

Diva Server V-2PRI and V-4PRI adapters are key building blocks for enabling large scale voice business applications. Based on the latest PCI standards, each adapter provides connectivity to the telephony network via 2 or 4 ISDN Primary Rate (PRI) or E1/T1 interfaces. Extremely powerful Digital Signal Processors (DSP) – each one dedicated to 6 communication channels - ensure real-time voice processing reducing system latency and improving overall system performance. An open and well documented application programming interface (API) combined with support for a broad range of operating systems facilitates development of leading-edge voice business applications.

**Key Benefits**

**World-Class Voice Processing**
Diva Server V-2/4PRI adapters provide a full set of voice processing functions including tone detection and generation, voice activity detection and echo cancellation. Onboard DSPs perform these complex operations in real-time enhancing overall system performance and lowering implementation cost.

**Facilitates Speech-Enabled Applications**
Thanks to supporting full-duplex voice channels, callers can use an application-friendly feature known as "Barge-In". This allows a caller to interrupt speech prompts by speaking over them thereby controlling the pace of the conversation for a more pleasant user experience and better platform utilization. Enhanced echo cancellation and voice activity detection improve recognition accuracy and make better use of host platform resources.

**Enhanced Switching and Conferencing Support**
Diva Server V-2/4PRI adapters support line interconnection and conferencing of calls on a single board as well as across boards within a server. Automatic gain control (AGC) is provided to automatically adjust the signal level of incoming calls for recording at normal levels.

**Robust Voice Over IP (VoIP) Technology**
For integrating established voice, speech and conferencing applications with emerging IP-Telephony clients and IP-Phones, Diva Server V-2/4PRI provides key enabling features such as voice packetization into real-time transport protocol (RTP), adaptive jitter buffer and comfort noise generation.

**Supports Best-of-Breed Applications**
The support of standardized software interfaces such as CAPI 2.0 or TAPI as well as an open API (Diva Server SDK) facilitate the development of voice business applications. Common applications include voice portals, speech enabled interactive voice response (IVR) systems and media servers.

**Superior Scalability and Flexibility**
Up to four Diva Server V-2/4PRI adapters - offering 60 to 480 channels - can be installed and operated concurrently in a single server. In addition to the V-2/4PRI adapters any type of Diva Server adapter whether Analog, ISDN BRI, ISDN PRI, E1/T1 and SoftIP (VoIP) can be mixed and matched. In that case the maximum number of Diva Server adapters per server may be eight. This allows to install single systems scaling from 2 to 480 channels.

**Easy to Install**
Diva Server V-2/4PRI adapters conform to Intel and Microsoft Plug and Play standards, eliminating the need to manually configure the server.
### Technical Specifications

#### Hardware
- 64-bit RISC CPU, 466 MHz, 1070 MIPS with 64MB SDRAM
- 10 (V-2PRI) or 20 (V-4PRI) DSPs, 600 MHz, 1200 MIPS each
- 32MB SDRAM per DSP
- Telephone Interface:
  - 2 or 4 RI-45 connectors, software-selectable E1/T1 interfaces
  - 2 or 4 ISDN Primary Rate Interface (PRI) configurations
- High-Impedance Mode for passive monitoring
- Physical dimensions:
  - 312.00 mm x 106.68 mm (PCI)
  - 352.17 mm x 126.37 mm (incl. bracket and retainer)
- I/O addresses, memory and interrupt allocated automatically
- Host Interface
  - Full-size PCI form factor
  - PCI 2.2 (3.3 and 5.0 V required) supported in PCI-X slots
  - PCI Plug and Play
  - Scalable to 4 adapters per system

#### Environmental
- Operating temperature: 10°C to 50°C
- Maximum tolerance in power supply variation: -5% to +5%

#### Power Consumption
- V-2PRI: 3.0 A @ +3.3 V typical, 4.9 A @ +3.3 V maximum
- V-4PRI: 5.5 A @ +3.3 V typical, 6.5 A @ +3.3 V maximum

#### Warranty
- 5 year warranty

#### Certifications and Approvals
- EMC: FCC part 15, EN55022, EN55024
- UL 60950
- EN 60950
- CE Mark
- FCC Part 15
- EN55022, EN55024
- V-2PRI: 40 to 80mA @ +5 V (blue LEDs)
- V-4PRI: 80 to 160mA @ +5 V (blue LEDs)
- Telecom: TIA 968-A (FCC part 68), TRB4
- Europe (CE Mark), US and Canada

#### Driver Software
- Linux: RedHat, SuSE and Debian distributions as well as source level RPM and DEB
- Application Interfaces:
  - Microsoft: WIN Miniprogram, COM Port, TAPI, CAPI 2.0, extended CAPI, Diva Server API (SDK), Component API (VB6 and VB.NET)
  - Linux: TTY, CAPI 2.0, extended CAPI, Diva Server API (SDK)
- M-Adapter Feature (patent pending): Combined Virtual Adapter, Internal Call Transfer, Explicit Call Transfer Emulation

### Call Control Features

#### D-Channel and Signaling Protocols
- ETSI-DSS1 (Euro-ISDN), N-1 (North America National ISDN 1), 1TR6 (Germany), NET3 (Belgium), VN3/4/6 (France), 4ESS (AT&T), 5ESS (AT&T), 5ESS (Lucent), DMS100 (Nortel), T1/RBS (Robbed Bit Signaling), INS-64 (Japan), INS-1500 (Japan), Australia on-ramp, Q-SIG, E1/R2 (China), E1/R2 (India), Channelized E1, External Signaling (transparent D-channel), Direct Access Mode (no signaling), Network Terminatation (NT Mode)

#### ISDN Supplementary Services
- Number identification services (CLIP, CLIR, COLP, COLR, KEY, MSN, DDI, SUB), Call offering services (TP, CFU, CFB, CFNR), Call completion services (CW, HOLD, ECT), Charging Services (AOC), Three-party conference, Large Conference

### Media Processing Features

#### B-Channel Protocols
- Transparent HDLC, Transparent (Voice), Synchronous PPP and MLPPP, X.75 (LAPB), X.25, T.90NL, T.70NL, Rate adaptation (56 kbps), V.42bis, V.120, HIFAS

#### Voice and Speech

#### Switching & Conferencing
- On-board switching, Cross-board switching, G.168 echo cancellation (128ms), automatic gain control (AGC)
- Office (V-2PRI): 40 to 80mA @ +5 V (blue LEDs)
- Office (V-4PRI): 80 to 160mA @ +5 V (blue LEDs)

#### Fax Support
- Fax group 4

#### Remote Access (RAS)
- Via HDLC, V.120, X.75
