

FXO-100 Module

The FXO-100 module allows the A-400PCI card to terminate analog telephone lines (POTS). Because of the modular design, a user can activate additional ports at any time with more FXO-100 or FXS-100 daughter cards. The FXO-100 module passes all the call features any standard analog telephone line will support.

- ◆ **Pin to Pin compatible with Digium's X100M.* daughter card.**

FXS-100 Module

The FXS-100 module allows the A-400PCI card to terminate analog telephones. Because of the modular design, a user can activate additional ports at any time with more FXS-100 or FXO-100 daughter cards. The FXS-100 module passes all the call features any standard analog telephone will support.

- ◆ **Pin to Pin compatible with Digium's S100M.* daughter card.**
