Gigaset Fusion FX800W All-In-One Telephone System Bundle with 2x SL800H Handsets
The Gigaset Fusion FX800W is a professional all-in-one telephone system in a timelessly elegant design that is a desk phone, DECT base station, mini telephone system and Smart Home base all in one device. All settings and functions can be individually configured via a web-based UI and be set intuitively via the newly developed user interface on the bright touch-and-swipe display.
Gigaset Fusion Key Features:

ï¿½ 5" 720p touch-and-swipe display with intuitive user interface
ï¿½ Mini PBX with up to 20 users* and integrated DECT base station
ï¿½ Up to 6 simultaneous calls (max. 4 DECT calls)
ï¿½ Integrated Gigaset Smart Home base
ï¿½ Access to Google and Microsoft 365 contacts
ï¿½ Headset connection via USB-C or Bluetooth
ï¿½ Flexible connection options thanks to dual-band Wi-Fi and PoE LAN interface
ï¿½ 5 local answering machines, incl. message download function
ï¿½ Includes 2x SL800H Handsets

The Gigaset Fusion makes day-to-day work easier and is the ideal solution for small offices, medical practices, law firms, agencies and sophisticated home offices.
Ideal for new hygiene concepts
The phone system is suitable for implementing new hygiene protocols because of its top-notch features. It is made with high-quality materials, such as a disinfectant-resistant surface and UV-hardened finish, which enable it to be used flexibly in different locations. Moreover, its exclusive design elements, like the easy-to-clean, bright touch-and-swipe display, make it effortless to maintain cleanliness, especially in areas where hygiene is crucial. Overall, the Gigaset Fusion is an all-in-one high-end device that provides a simple and effective way to keep the cord phone clean.
Broad connectivity provides flexibility
The Gigaset Fusion phone system offers maximum flexibility due to its extensive connectivity options. It features USB-C and Bluetooth connectivity, which allow you to connect external devices like headsets in the way that suits you best. Moreover, its flexible dual-band 5GHz/2.4GHz WiFi module makes it easy to connect to the internet and seamlessly integrate the Fusion with your existing network without any hassle. Additionally, the 2-port gigabit switch ensures a fast LAN connection and power supply (PoE) for the device.
DECT base station functionality
The Gigaset Fusion phone system can function as a DECT base station, enabling you to connect up to eight Gigaset PRO handsets. This feature provides maximum flexibility and makes it easy to equip your company's work area with phones. Additionally, it offers the significant advantage of being reachable by your customers at all times with up to four simultaneous calls, even during peak times with high call volumes.
Easy contact management
The Gigaset Fusion phone system comes with a central phone book that can hold up to 500 entries, allowing you to manage and synchronize all your customer contacts easily. This includes

Gigaset Fusion FX800W All-In-One Telephone System Bundle with 2x SL800H Handsets - DISCONTINUED

your existing mobile phone contacts, which can be imported quickly via Bluetooth, as well as your native Google and Microsoft 365 and LDAP contacts. Moreover, the Gigaset Fusion offers many convenient features, such as up to 72 programmable display keys and widgets that can be customized to suit your needs. Additionally, colored BLF buttons indicate if a line is available, and the display night mode helps conserve energy.

Customisable display content

The Gigaset Fusion phone system makes it easy and quick to get started with its numerous installation wizards. For instance, you can personalize the display content by selecting from a range of backgrounds and predefined images or by integrating personal images like a digital photo frame. Moreover, the Fusion provides three main screens that can be easily accessed by swiping between them. This allows you to access all the necessary information and links conveniently.

Award-winning web user interface

The new Gigaset Fusion has been honored with one of the world's most prestigious design awards, the iF Design Award. The International Forum Design in Germany focuses on the innovative combination of aesthetics and functionality, which is exemplified by the completely overhauled phone and web user interface of this all-in-one system. This user-friendly interface allows access through any internet browser and offers a complete overview of the system at all times. It features intuitive wizards, simple menu structures, and fold-out chapters that provide information about the current status of the Gigaset Fusion, connected devices, groups, voicemails, call forwarding rules, web dialing, call lists, external lines, and much more.

Environmentally friendly and radiation-free thanks to ECO DECT

The DECT eco mode and DECT eco mode+ functions of the Gigaset Fusion demonstrate an environmentally friendly solution. These functions offer an impressive 80% reduction in transmission power and energy-efficient transmission deactivation when the device is not in use. Additionally, the Fusion includes a proximity sensor that detects when the user is near and automatically wakes the device from sleep mode.

Funtionality as a mini phone system

The Gigaset Fusion comes equipped with an integrated mini-PBX that can handle up to 20 SIP extensions, whether connected through mobile devices or permanently installed desk phones. The SIP connection is also secure with SRTP/SIPS/TLS, LDAP(S) and HTTPS. With up to six parallel calls, you can still be easily reached by your customers.

The Fusion as a Gigaset Smart Home base

The Gigaset Fusion is compatible with Smart Home technology, allowing you to connect up to 64 Gigaset ONE X sensors from our product range. You can manage these smart home functions centrally or remotely via the Gigaset elements app. Additionally, the Easy Alarm Mode switch on the display allows you to switch on the alarm mode directly when leaving your desk, providing added convenience.
