

Fanvil HT302 Dual Wideband QD to RJ9 Headset

Product Name: Fanvil HT302 Dual Wideband QD to RJ9 Headset

Manufacturer: Fanvil

Model Number: HT302

Fanvil HT302 Dual Wideband QD to RJ9 Headset

The Fanvil HT302 is a USB wired headset which is specially designed for office and call center communication. With dual microphones, the HT302 supports ENC noise reduction technology, offering an immersive HD audio experience. Streamlined ergonomic design, soft leather ear cushions and ultra-lightweight provide all-day comfort for you to wear.

Fanvil HT302 Dual Key Features:

• Adjustable headphone

• RJ9 interface

• HD Wideband audio

• ENC Environmental Noise Cancellation Technology

• Dual color LED indicator

• Built-in controller: Answer/Hang up Button, Mute Button, Volume +/- Button

You can choose the HT301 mono headset or the HT302-U dual headset according to your preference, both of which support connecting to Fanvil IP phones with RJ9 interfaces, third-party mainstream IP phones with RJ9 interfaces, and PC devices.

• **Dual Mic Noise Reduction:** Support ENC Environment Noise Cancellation Technology to reduce the background noise in the environment, bringing a crystal-clear communication experience to the listener

• **HD Audio:** Support wideband HD audio, which is designed for the calling and music. Support Anti Electromagnetic Frequency Interference and dynamic EQ function providing more vivid and rich audio quality

• **All-day Comfort:** Ergonomic design with soft leather ear cushions and ultra-lightweight. 260° bendable boom arm allows users to wear according to their preference

• **Strong Compatibility:** Compatible with Fanvil IP phones with RJ9 interface, as well as the third-party mainstream IP phones and PC devices with RJ9 interface.
