

Snom M6 DECT Repeater

Product Name: Snom M6 DECT Repeater

Manufacturer: Snom

Model Number: M6

Snom M6 DECT Repeater

The snom M6 DECT repeater extends the range of DECT base stations, whether in multicell or single base setups, across multiple floors or large buildings without a LAN connection. It enhances transmission and reception ranges, creating a seamless wireless network for uninterrupted conversations.

Snom M6 DECT Repeater Key Features:

- Works with both multi-cell and single-cell base configurations.

- Handles 8 simultaneous calls.

- Extended range without network connection

- Wideband audio quality

Compatible with various single and multi-cell systems like M300, M400, M700, and M900, the M6 repeater optimizes DECT network performance. Users can move freely between stations without losing conversation quality, making it a reliable solution for improved DECT system capabilities.
