

Snom M400 and Snom M30 DECT Bundle

Product Name: Snom M400 and Snom M30 DECT Bundle

Manufacturer: Snom Model Number: M430-UK

Snom M400 and Snom M30 DECT Bundle

The Snom M400 Dect single-cell base provides a comprehensive set of business telephony features, supporting up to 10 simultaneous calls (narrowband) with a maximum of 20 handsets. Cloud and VoIP PBX partners can benefit from convenient features like remote maintenance and zero-touch setup.

Snom M400 and Snom M30 DECT Bundle Key Features:

� Up to 10 simultaneous calls

� Up to 20 handsets

12.1/2 Wireless software updates for handsets (OTA)

� Security

The M400 base adheres to the latest encryption standards and shares the same software and security update architecture as the Snom M900 multi-cell system. This ensures robust security and seamless integration across different Snom products, offering a reliable and scalable solution for businesses seeking advanced communication capabilities.
