Yealink AVHub
The Yealink AVHub is a versatile audio and video processor designed for use in large conference rooms and conference fields. It supports multiple cameras, microphones, and speakers, streamlining PC performance by handling audio and video processing efficiently. With the convenience of PoE network cable connectivity, AVHub simplifies equipment setup and management. Users can adjust camera layouts using the Yealink plugin before or during Microsoft Teams Room meetings, and with AVHub integrated into room systems, multiple cameras can capture participants from different angles. Remote attendees can view customised video layouts, making it suitable for various industrial applications.
Yealink AVHub Key Features:

ï¿½ Multi-Device Support
ï¿½ PoE Network Connectivity
ï¿½ Camera Layout Adjustment
ï¿½ Advanced AI Capabilities

Equipped with advanced AI capabilities, AVHub ensures future scalability, including features like Microsoft Teams' together mode, and it reduces the operational load on the CPU by handling audio and video processing directly. This not only enhances system performance but also contributes to a smoother user experience in large-scale meetings and conferences. Whether you're looking to improve video conferencing in expansive spaces or simplify audio and video equipment management, Yealink AVHub offers a powerful and flexible solution.
