

Product Name: Grandstream GWN7831 28PORT L3 SWITCH

Manufacturer: Grandstream Model Number: GWN7831

Grandstream GWN7831 28PORT L3 SWITCH

The Grandstream GWN7830 Series comprises Layer 3 aggregation managed switches designed to empower enterprises in establishing scalable, secure, high-performance, and intelligent business networks that are easily controllable and capable of handling peak loads. It offers advanced VLAN functionality for versatile traffic segmentation, enhanced QoS to prioritise network traffic, IGMP/MLD Snooping for optimising network performance, and robust security features to guard against potential threats.

Grandstream GWN7831 Key Features:

ï¿1/2 4x combo Gigabit Ethernet ports

� 24 Gigabit SFP ports

� 4 Gigabit SFP+ ports

ï¿1/2 Supports deployment in IPv6 and IPv4 networks

าั¿½ ARP Inspection, IP Source Guard, DoS protection, port security & DHCP snooping

าะ/½ Embedded controller to manage switch; GWN. Cloud and GWN Manager,

Grandstream's cloud and on-premise network management platform

ī సైస్ Built-in QoS allows for prioritisation of network traffic

Management of the GWN7830 series is possible through various methods, including the local Web user interface and the CLI (command line interface). Furthermore, this series is compatible with GWN.Cloud and GWN Manager, Grandstream's cloud and on-premise network management platform. With comprehensive quality of service, adaptable security configurations, and support for maximum network capacity, the GWN7830 Series presents itself as an excellent choice for medium-to-large deployments in need of enterprise-grade Layer 3 aggregation switches.
