

Snom HD30LA Analogue Lobby Phone (HD30LA)

Product Name: Snom HD30LA Analogue Lobby Phone (HD30LA)

Manufacturer: Snom

Model Number: HD30LA

Snom HD30LA Analogue Lobby Phone (HD30LA)

Beautifully designed, corded analogue lobby phone

The Snom HD30LA is a clearly laid out and slim modern analogue hotel lobby phone. It has no keypad and starts an automated dialing to a specified destination when the handset is lifted - provided it is supported by an analogue PABX system: This eliminates the risk of a wrong dialling. With the analogue Snom lobby phone, you can ensure a smooth, intuitive user experience in any hotel lobby, waiting area or corridors. The antibacterial housing protects against germs and is easy to clean. Thanks to the inlay on the receiver shell, the HD30L is easy to customise. Table or wall-mounting possible. Three additional programmable buttons provide additional functionality if required.

GDPR compliant by design: The Snom HD30LA also sets standards in terms of data protection and security. It was developed in accordance with the requirements of the GDPR and does not store any personal data such as dialed phone numbers.

Snom HD30LA Key Features
