

Gigaset SL850H PRO Cordless DECT Handset (SL850H)

Product Name: Gigaset SL850H PRO Cordless DECT Handset (SL850H)

Manufacturer: Gigaset

Model Number: SL850H

Gigaset SL850H PRO Cordless DECT Handset

The Gigaset SL850H PRO is the smallest and lightest DECT handset in the Gigaset Professional portfolio. Despite its compact dimensions, it features a large 2.4" colour display, is equipped with the latest technology and offers a timeless, elegant design that makes it an eye-catcher in any workplace. Equipped with many high-end features, the SL850H PRO meets the highest user demands.

The excellent battery life of up to 12 hours of talk time, the integrated vibration alarm and the high-quality scratch- and disinfectant-resistant surface make the SL850H PRO the perfect business phone. Software features include efficient configuration via autoprovisioning, SUOTA and support for alarm, messaging and location (AML). It is powered by AAA batteries and is therefore well equipped to meet the requirements of the EU Ecodesign Directive.

Gigaset SL850H PRO Cordless DECT Handset Key Features

- Large 2.4-inch TFT colour display with 240 x 320 resolution
- Bluetooth 5.1 support for wireless headset connectivity
- Integrated USB-C port for charging and updates

- HD Voice with CAT-iq certified wideband audio
- Up to 13 hours talk time and 320 hours standby time
- Supports Microsoft Teams integration on compatible Gigaset systems
- Advanced Alarm, Messaging & Location (AML) functionality
- Dedicated programmable function key for quick access features
- Supports 500-contact address book
- Integrated vibration alert and illuminated keypad
- Scratch-resistant and disinfectant-resistant surface
- Lightweight design at only 114g
- Uses replaceable AAA rechargeable batteries
- Compatible with Gigaset PRO single-cell and multi-cell DECT systems

Design and ergonomics – an eye-catcher in any working environment

The Gigaset SL850H PRO is the smallest and lightest DECT handset in the Gigaset Professional portfolio – proving that compactness and full business functionality go hand in hand. The handset impresses with its timeless, elegant design that exudes professionalism and blends harmoniously into any working environment. Measuring just 133 x 52 x 22 mm and weighing 114 g, it is compact yet ergonomic and comfortable to hold. The high-quality surface with a harder coating protects against scratches and is resistant to common disinfectants. The handset is also equipped with an easy-to-clean keypad cover. This is a clear advantage for industries where hygiene is a top priority – from hospitals to modern office spaces. The SL850H PRO DECT handset combines style and everyday practicality and can withstand the demands of even the most discerning business customers.

Display and ease of use – everything at a glance

The Gigaset SL850H PRO business DECT handset has a large 2.4-inch TFT colour display with brilliant resolution and high contrast. The intuitive user interface, 5-way navigation key and illuminated keypad make operation quick and easy. In addition, the freely configurable function key on the top of the device provides quick access to individual core functions, such as speed dialling, alarm or push-to-talk. This makes the Gigaset SL850H PRO flexible and ideally suited to professional requirements.

Flexible connectivity – perfectly connected for every work situation

Whether wired or wireless, the Gigaset SL850H PRO adapts to the demands of everyday business life. The DECT phone supports Bluetooth® 5.1, allowing headsets to be connected

Gigaset SL850H PRO Cordless DECT Handset (SL850H)

quickly and easily. Those who prefer a wired solution can use the integrated 3.5 mm connection. The modern USB-C interface not only allows data to be transferred and software to be updated, but also the handset to be charged – a plus point for flexible use in dynamic working environments.

Business features that make the difference

The Gigaset SL850H PRO is equipped with numerous features that are specially tailored to the requirements of modern business communication. Auto-provisioning enables central configuration of multiple devices, significantly reducing installation and maintenance costs. With SUOTA (Software Update Over the Air), firmware updates can be carried out conveniently and without on-site intervention. The SL850H PRO supports Microsoft Teams and allows you to make and receive calls and access voicemails. You can also participate in Teams meetings. Prerequisite: The SL850H PRO must be connected to one of the newer Gigaset single or multi-cell systems. Alarm, Messaging & Location (AML) – security at the highest level
Whether in healthcare, industry or public institutions, the Gigaset SL850H PRO is optimally equipped for use with AML and offers advanced alarm and protection functions.

½ Help at the touch of a button: the alarm button allows a person to trigger an emergency call immediately.

½ Location tracking in emergencies: The handset can act as a Bluetooth Low Energy (BLE) beacon. Each beacon is assigned to an employee and is detected by location servers or BLE receivers. This allows the person's location to be determined quickly and accurately in an emergency.

This enables companies to increase the protection of their workforce and gain valuable time in critical situations.

Easy integration into professional systems

The Gigaset SL850H PRO is optimised for use with all professional Gigaset DECT systems and can also be used with third-party CAT-iq and GAP-based solutions. Whether in single or multi-cell scenarios (Gigaset N530/ N610/ N670/ N770/ N870/ N870E), the handset can be flexibly integrated into existing infrastructures, offering a high level of investment security.
