

## Yealink WH64 Mono DECT Wireless Headset Workstation (WH64 Workstation Mono)

Product Name: Yealink WH64 Mono DECT Wireless Headset Workstation (WH64 Workstation Mono)  
Manufacturer: Yealink  
Model Number: WH64 Workstation Mono

### Yealink WH64 Mono DECT Wireless Headset Workstation (WH64 Workstation Mono)

The Yealink WH64 Mono Workstation is a DECT wireless headset bundle designed for professionals who need wireless freedom while keeping one ear available to their environment. The monaural (single-ear) design is well suited to those who regularly alternate between phone calls and in-person interactions, keeping you informed of what is happening around you without breaking from a call. DECT wireless on the interference-free 1.9 GHz spectrum ensures stable, consistent audio up to 150 metres from the base. The workstation bundle includes the DECT base station and headset, providing out-of-the-box connectivity to both a desk phone and a PC or softphone. Call controls on the headset; answer, end, mute, and volume, mean you never need to return to your desk to manage a call. The adjustable boom microphone can be positioned left or right to suit the user, and the lightweight design keeps wearing fatigue low through a full shift. A no-fuss, value-focused wireless headset for frontline office workers. Yealink WH64 Mono Workstation Technical Specifications: Personalisation
