Product Name: Yealink WH68 Dual-Ear DECT Wireless Headset Workstation (WH68 Workstation)

Manufacturer: Yealink

Model Number: WH68 Workstation

Yealink WH68 Dual-Ear DECT Wireless Headset Workstation (WH68 Workstation)

The Yealink WH68 Dual-Ear Workstation is a premium DECT wireless headset bundle engineered for high-call-volume environments where audio quality and wireless range matter. The extended DECT range of up to 180 metres gives staff in larger premises the freedom to move without dropping a call, while the binaural (dual-ear) design with noise-cancelling microphone keeps both the listener focused and the remote party hearing clearly. AI-enhanced noise cancellation filters out office background noise before it reaches the far end. The workstation bundle ships with the DECT base station and headset, supporting simultaneous connection to a desk phone and a PC or softphone. HD Voice (wideband audio) ensures calls are crisp at both ends, and the on-headset controls, including answer, end, mute, and volume; allow complete call management away from the desk. Leatherette ear cushions and an adjustable headband make the WH68D comfortable for full-shift wear. A strong choice for contact centres, support desks, and any team that depends on reliable, high-quality wireless audio. Yealink WH68 Dual-Ear Workstation Technical Specifications Personalisation

- Adjustable headband
- Leatherette ear cushions
- Flexible noise-cancelling boom mic
- Wearing style options

Management
