Model Number: 11204313030

Please Note: This is the Euro profile cylinder body only. A 2N Fortis Cylinder Electronic Knob and/or Mechanical Knob (sold separately) is required to complete the lock.

2N Fortis Cylinder Euro Profile 30/30 (11204313030)

The 2N Fortis Cylinder is a wireless electronic lock designed for secure, keyless access to residential apartments, including retrofits. It's the final piece in 2N's end-to-end access solution: fast to install, simple to manage, and it enables residents to unlock all their doors with a single credential. This Euro profile cylinder is ideal for doors that require a fully locked bolt, rather than just a latch. It pairs with a 2N Fortis Cylinder Electronic Knob to provide RFID or mobile keyless entry, or a Mechanical Knob for a traditional key-operated side. No cables or special tools are needed for installation, cutting both labour time and expense on most European doors. The cylinders are a native part of the 2N access control solution and are centrally managed via 2N Access Commander. 2N Fortis Cylinder Technical Specifications:

Dimensions

ï¿½ Profile: Euro profile

ï¿½ Cylinder length: 30/30mm (available from 26/26mm to 70/70mm, in 5mm steps from 30/30mm)
