

2N Fortis Cylinder Mechanical Knob (1120421)

Product Name: 2N Fortis Cylinder Mechanical Knob (1120421)

Manufacturer: 2N Telecommunications

Model Number: 1120421

Please Note: This is the mechanical knob (manual side) only. A 2N Fortis Cylinder body (Euro or Scandinavian profile, sold separately) is required to complete the lock.

2N Fortis Cylinder Mechanical Knob (1120421)

The 2N Fortis Cylinder Mechanical Knob is the manual-operation side of the 2N Fortis Cylinder, a wireless electronic lock designed for secure, keyless access to residential apartments, including retrofits. It's typically installed on the interior side of the door, providing reliable manual operation to complement an electronic knob (RFID or mobile access) on the exterior side. It's compatible with all cylinder types in the 2N Fortis range, including both Euro profile and Scandinavian oval profiles. No cables or special tools are needed for installation, cutting both labour time and expense on most European doors. 2N Fortis Cylinder Mechanical Knob Technical Specifications:
