

2N Mini Electronic Door Strike Series 5 - Long (11202101-L)

Product Name: 2N Mini Electronic Door Strike Series 5 - Long (11202101-L)

Manufacturer: 2N Telecommunications

Model Number: 11202101-L

2N Mini Electronic Door Strike Series 5 - Long (11202101-L)

The 2N Mini Electronic Door Strike Series 5 - Long is a compact, symmetrical electric strike designed for integration with access control systems, specifically 2N IP Intercoms. Its primary advantage is its slim 16mm profile, making it ideal for narrow door frames such as aluminium, wood, or PVC. It is fully reversible and exceptionally robust, engineered for easy installation within door frames, and is notably efficient in power consumption when opening standard doors. This "Long" variant is supplied with a 250mm metal cover plate (as opposed to the 130mm plate on the standard-length version). The mechanical housing is equipped with a rotating radial latch, ensuring seamless functionality. Its space-saving design and versatility make it an ideal choice for various door types and frame materials. This strike unlocks when under power, and also has a mechanical switch that allows the door to be kept permanently open.

2N Mini Electronic Door Strike Series 5

Technical Specifications:

Mechanical Properties

• Width: 16mm

• Cover plate length (this variant): 250mm

• Housing: ZAMAK

• Catch: ZAMAK

• Adjustable catch: Yes (radial)

• Reversible: Yes

• Electronic protection: Yes

Ratings & Standards

• Max. load against unauthorised penetration: 4,000 N

• Operating temperature: -15°C to +40°C

• Electromagnetic compatibility per 2004/108/CE (EN 55014)

• Corrosion resistance per UNI ISO 9227

Monitoring Parameters (with microswitch)

• Power: 1A/125V AC or 0.5A/30V DC

• Operating speed: 500mm/second (at the pin)

• Operating frequency (mechanical): 200 operations per minute

• Operating frequency (electric): 30 operations per minute

• Contact resistance: 50mΩ; maximum

• Insulation resistance: 100MΩ; minimum (@ 500V DC)

• Operating temperature: -25°C to 65°C (free of ice)

• Relative humidity: Max. 85% (5°C to 35°C)

• Expected lifespan (mechanical): Min. 300,000 operations

• Expected lifespan (electric): Min. 30,000 operations

Package Contents

• 1 x 2N Mini Electronic Door Strike, Series 5 - Long (with 250mm metal cover plate)
