With the SBK-32, SIM cards no longer need to be installed in a MV-37X anymore; you can deploy your GSM gateways in different locations and countries. New concept of using SBK-32 solution, you can centralize and supervise all sims in one place.

Key Specifications/Special Features

- Handle 32 SIM cards per SBK-32
- Central management and secure storage of all SIM cards
- Control and Supervision of your SIMs from your office
- Allow you to choose the best GSM operators price plan
- Immediate control of all your SIM cards from your office
- Easy and powerful web based management, Easy to configure convenience any time!
- Switch SIM cards between connected gateways, configuration via remote client
- Save huge costs on technicians and traveling to the installation sites- Save on travel expense and precious time- Save the cost on site' technicians- Save the down time between maintenance
- DIM:20cm x 14cm x 16.5cm

In that case, SIM management will be easy, quick and safe as well. All SIM cards can be stored and control in one secure place. Once in a while, MV-37X must change SIM cards to get the best rate on different GSM operators. With SBK-32, you can place physical sims in office or change SIM corresponding port directly on web any second. MV-37X connects with SBK-32 to read the SIM information and register it on the GSM network.
