

Redfone foneBRIDGE2 Single Port T1/E1 to TDMoE

Product Name: Redfone foneBRIDGE2 Single Port T1/E1 to TDMoE Manufacturer: -Model Number: 750-4000

Redfone foneBRIDGE2 Single Port T1/E1 to TDMoE

Designed as a low-cost alternative to old fashioned PCI based cards, the new single port foneBRIDGE2 is a T1/E1-to-Ethernet Gateway. It is an integrated black-box "appliance" designed to streamline installation and enable redun-dant design of Asterisk based VoIP systems.

foneBRIDGE2 eliminates the need to install proprietary TDM PCI hardware cards in approved or compatible server configurations. Instead, foneBRIDGE2 terminates T1/E1 lines on the trunk side and provides direct Ethernet commu-nication to a network of PBX servers using native Asterisk TDMoE formats and utilities. Engineered around our unique high-speed SoC (System-on-Chip) TDMoE engine, foneBRIDGE2 provides low-latency delivery of your critical voice traffic. Target Applications
