Manufacturer: -

Model Number: SNOMRB-V2

Please Note: This product is end of life. As an alternative we recommend the Snom D3 Expansion Module.

Snom Expansion Module V2.0 for 320, 360 & 370

The Snom Expansion Module V2.0 for 320, 360 & 370, your snom phones have the best features to meet the requirements of executive and administrative staff who require high call coverage and flexibility from communication systems.

Your snom 320, 360 and 370 VoIP phone is equipped with 12 programmable keys and LEDs. Using your snom phone with the snom Expansion Module, call coverage and management is even more easy and efficient to handle. With the expansion module, you add 42 additional programmable keys and LEDs, increasing the total number of keys and LEDs to 54.

More comfort is provided by the built-in web interface of your snom 360 VoIP phone. With the built-in web interface, you can easily configure each function key according to your preferences. Each key of your expansion module can be programmed for Line, Destination, Intercom, Park Orbit, or Voice Recorder mapping. Line or call state, e.g. ringing, on-hold, connected call etc., will be shown by the LEDs associated with each key.

Note: Please refer to the snom IP Phone Range Detailed Comparison Table for more information.
