as a good alternative.

Stylish and functional in design, the SPA-921 IP Phone is ideal for a residence & Dusiness using a hosted IP telephony service, an IP PBX, or a large scale IP Centrex deployment.

تزايد The SPA921 leverages industry leading VoIP technology from Linksys to deliver an upgradeable High Quality IP phone that is Unparalleled in features, value, and support. าั¿½ Standard features on the SPA921 include a high resolution graphical display, speakerphone, and a 2.5 mm head-set port.

าั¿½ The SPA-921 supports one line with two call appearances and provides support for three way conferencing, attended call transfer, and placing a call on hold to answer an incoming call. เช่น The line can be configured as a unique phone number (or extension), or can be configured to share a number that is assigned to multiple phones.

Features:

- 12/2 Full featured one-line business class IP phone
- ī¿½ Speakerphone. Caller ID. Call Hold, Transfer, Conferencing, and more
- าั¿½ Easy to install with secure remote provisioning. Menu based and web based configuration.
- 12.1/2 Comprehensive Interoperability and SIP Based Feature Set
- าั¿½ Connect directly to an Internet Telephone Service Provider or connect to an IP PBX

Based on the SIP standard, the SPA921 has been tested to ensure comprehensive interoperability with equipment from VoIP infrastructure leaders enabling service providers to quickly roll-out competitive, feature rich services to their customers. With hundreds of features and configurable sevice parameters, the SPA-921 addresses the requirements of traditional business users while leveraging the advantages of IP telephony. Features such as easy station moves, presence, and shared line appearances (across local and geographically dispersed locations) are just some of the many advantages of the SPA921.

Carrier-Grade Security, Provisioning, and Management

The SPA921 uses standard encryption protocols to provide secure remote in-service software upgrades. Linksys secure remote provisioning tools include detailed performance measurement and troubleshooting features, enabling network providers to deliver high quality support to their subscribers. Remote provisioning also saves service providers the hassle and expense of managing, preloading, and re-configuring customer premise equipment (CPE). Package Contents
