

Boscom Quasar Cellunet Gateway

Product Name: Boscom Quasar Cellunet Gateway

Manufacturer: Boscom

Model Number: -

Availability: Discontinued

Quasar's proven cellular technology creates gateways between the corporate PBX and cellular network to enable cost savings of up to 60% in the corporate and SOHO markets. Over 100,000 installations worldwide are proving the point: Quasar gateways get the message through at the lowest cost and with the highest reliability.

Compatible with any PBX, Quasar gateways connect between corporate PBXs and all types of cellular phones, eliminating Network charges on fixed to cellular calls!

VoIP GSM Gateway Cellular Gateway for a SIP VoIP connection

The Quasar CelluNet VoIP gateway provides a bridge between the SIP VoIP and the GSM Cellular world. It allows you to provide GSM access with IP PBX systems that support SIP or for direct connection to a SIP service provider, this is the next generation of gateway that helps the move away from legacy interfaces such as analogue or ISDN and helps to leverage the IP network. The gateway enables users of IP networks to make use of reduced mobile to mobile costs.
