Elmeg IP290 IP Telephone

Elmeg IP290 IP Telephone

Product Name: Elmeg IP290 IP Telephone Manufacturer: Elmeg Model Number: -

Availability: DiscontinuedFor a high quality similiar alternative please see the Snom 300The Elmeg IP290 encompasses the important aspects of demanding business customers using the latest VoIP technology. Fitted with a two-line graphical display, the IP290 supports alphanumeric caller ID and a feature-rich user interface. An extra Ethernet port for the enables users to "daisy chain" the phone with their PCs without the necessity for an extra LAN socket. For hands-free operation a standard PC headset can be used. Using SIP, the IP290 interoperates with equipment with standard compliance from other vendors. Advanced features like call pickup and parking or automatic call-back are implemented using latest standards. The programmable keys make the IP290 quick and easy to find numbers and initiate calls. Support for SIPS and SRTP allow voice conversations on a very high security level. The various support avenues of NAT standards allows the operation in all environments where VoIP is possible.
