CyberData SIP Enabled IP Call Button (011049)

The SIP Call Button is a Power over Ethernet device that can be mounted under a desk or in a discrete location. If an event takes place, the user presses the button. The call button automatically makes a call to a pre-set phone or extension number. Key Features:

- ï¿1/2 User downloadable message up to 80 seconds
- ï¿1/2 Single button call to the pre-set number
- ï¿1/2 Continuous repeat of the message
- ï¿1/2 Call progress light
- ï¿1/2 Event-controlled relay
- ï¿1∕2 Tamper sensor
- ï¿1/2 Web-based setup
- � PoE-powered

When the called number answers, the call button plays and repeats a stored audio file. This stored audio file is uploaded by the administrator to meet the needs of the installed location. **Price: £453.50**
