CyberData SIP Enabled IP Call Button (011049)

Product Name: CyberData SIP Enabled IP Call Button (011049)
Manufacturer: CyberData
Model Number: 011049

CyberData SIP Enabled IP Call Button (011049)
The SIP Call Button is a Power over Ethernet device that can be mounted under a desk or in a discrete location. If an event takes place, the user presses the button. The call button automatically makes a call to a pre-set phone or extension number.
Key Features:

ï¿½ User downloadable message up to 80 seconds
ï¿½ Single button call to the pre-set number
ï¿½ Continuous repeat of the message
ï¿½ Call progress light
ï¿½ Event-controlled relay
ï¿½ Tamper sensor
ï¿½ Web-based setup
ï¿½ PoE-powered

When the called number answers, the call button plays and repeats a stored audio file. This stored audio file is uploaded by the administrator to meet the needs of the installed location.

Price: $572.20
