beroNet 400 BF4004FXO PCI Express 4 FXO Baseboard (BF4004FXOE)

Product Name: beroNet 400 BF4004FXO PCI Express 4 FXO Baseboard (BF4004FXOE)
Manufacturer: beroNet
Model Number: BF4004FXOE

beroNet BF4004FXO 400 PCI Express Baseboard, 1xBF4FXO and 1xBFBridge and 4xBFFXXCable 4 FXO (BF4004FXOE)

The beroNet 400 BF4004FXO PCI Express 4 FXO Baseboard (BF4004FXOE) is a powerful and flexible hardware solution   to connect ISDN (BRI,PRI) and GSM lines to any SIP based VoIP system.   This is not a Gateway and it is not a standard PCI / PCI express   card where you have to install any drivers, therefore we call it a   “Gatewaycard”. Due to the special design of the hardware will be   detected as a standard Realtek-Network card by the operating system.   Usualy the driver for this network card will be loaded automatically by   the OS. The only thing you have to do is to set up the IP-address   before you can access the web interface which is very easy to use. The card series has a modular concept and supports the following hardware DSP based Voice-Processing features:

ï¿½ G.168 / G.165 Echo cancellation with echo path change detection, up to 128ms
ï¿½ Codec translation: G.723.1 and Annex A, G.729a, G.726, G.711u/a
ï¿½ DTMF detection and generation
ï¿½ T.38 fax relay (V.27,V.29 and V.17)
ï¿½ SIP over TCP with SRTP and TLS (available Q4 2009)
ï¿½ Hardware Conferencing (available Q3 2009)
ï¿½ DSS1, EuroISDN conform (features set: COLP, CFU/CFB, CFNRY ...)
ï¿½ Q.SIG Basic-Features set: CNIP, CNIR, CONP
ï¿½ PCM Bus interconnection between cards to enable hardware   bridging for transparent voice, data and Fax transmission via optional   PCM-Bus cable. (available Q4 2009)
ï¿½ This Product Includes BF400E, BF4FXS

The card series consist of a baseboard and the so   calledLineInterfaces. Each baseboard can carry up to two LineInterfaces.   The base boards are available as PCI or PCI express cards with the following channel densities:

ï¿½ 400 (4 - 16 channels)
ï¿½ 1600 (16 - 64 channels)
ï¿½ 6400 (64 - 120 channels)

beroNet 400 BF4004FXO PCI Express 4 FXO Baseboard (BF4004FXOE)

The following Lineinterfaces are available and can be plugged on the card series.

ï¿½ BF4S0, 4 Port BRI module
ï¿½ BF1E1, 1 Port PRI module
ï¿½ BF2E1, 2 Port PRI module
ï¿½ BF1GSM,1 Port GSM module (available Q4 2009)
ï¿½ BF2GSM,2 Port GSM module (available Q4 2009)

Additionally to the baseboard and the LineInterfaces the following accessories are available for the card series:

ï¿½ bf4S0Bridge (to use all 4 RJ45 slots on a baseboard with one bf4S0)
ï¿½ bnTAdapters (to connect 2 BRI Lines on 14 RJ45 slots)
ï¿½ bnPCM Cable (to interconnect baseboards)
ï¿½ bnE1Crosscable (to connect E1 ports to other systems)

Due to the modular concept you can mix PRI, BRI and GSM ports on   onecard with full above mentioned features which makes the cards   very unique.
