

Dialogic Diva Server V-Analog-8P

Product Name: Dialogic Diva Server V-Analog-8P

Manufacturer: -

Model Number: -

Availability: In Stock Dialogic Networks™ Diva Server V-Analog are high-performance, PC-based telephony adapters that provide rich media processing capabilities for either four or eight analog trunk interfaces. They are the perfect choice for enterprises looking for small size voice, speech and conferencing platforms to get started, yet allow for easy expansion.

Powerful Digital Signal Processors (DSP) - one dedicated to each communication channel, ensures real-time voice processing reducing latency and improving overall system performance. Thus Diva Server V-Analog enables legacy and IP-based computer telephony (CTI) solutions, as well as leading edge voice business applications, such as voice portals and speech-enabled contact centers.

- World-class voice processing
- Onboard DSPs perform full set of voice processing functions
- Facilitates speech-enabled applications
- Full duplex operation and highest recognition accuracy
- Robust Voice over IP (VoIP) technology
- For integrating with emerging IP-Telephony applications
- Consistent Diva Server programming interface
- Design once - use on all!
- State-of-the-art operating systems supported
- Both Microsoft Windows as well as Linux
- Superior Scalability and Flexibility
- Up to 8 adapters can be operated concurrently in a server
- Easy to Install and Configure
- Plug and Play, no need to manually configure your server
- 5 year warranty, subject to product registration
