Gigaset N720 DM PRO - DECT manager - Multicell System

Please note: The Gigaset N720 IP PRO Base Station and Gigaset N720 DM PRO DECT manager are two elements which make up the Gigaset N720 DECT IP Multicell System. Please purchase both parts for the full IP Multicell System. The Gigaset N720 DM PRO - DECT manager - is part of the Gigaset Multicell System which consists of two elements: the N720 IP PRO, a base station, and the N720 DM PRO, the DECT manager.

Up to 20 base stations and 100 handsets can be connected to the DECT manager, enabling wireless mobility with seamless handover and roaming in on-site communication. This allows employees of small to medium businesses to benefit from cordless communication throughout the entire office. Power over Ethernet ensures no need for additional plug points. The N720 DECT IP Multicell System supports the latest generation of Gigaset DECT handsets, meaning users benefit from mobility in communication with exceptional HD sound. Features

- Seamless handover and roaming
- Up to 100 users / SIP accounts / handsets
- Exceptional HD sound with HDSP[®];1,2
- Up to 20 base stations
- Up to 30 parallel calls
- 8 simultaneous calls per base (4 in G.722 HDSP[®] mode)
- Local network directory and public online directories (white and yellow pages)¹
- Email reader
- Professional zero-touch auto-provisioning setup
- Power over Ethernet

Note: Please refer to the Multicell DECT Detailed Comparison Table for more information. Scalable and future-proof The N720 DECT IP Multicell System is expandable by up to 100 handsets and 20 base stations, allowing up to 30 parallel calls and 8 simultaneous calls per base station. A broad range of compatible Gigaset handsets is available for different business requirements. And the N720 DECT IP Multicell System guarantees interoperability with future generations of Gigaset handsets. Easy setup, configuration and connectivity The N720 DECT IP Multicell System is perfect to use with the Gigaset T500 PRO and T300 PRO IP PBX systems, which offer Computer Telephony Integration (CTI), zero-touch auto-provisioning and best interoperability. The intuitive web-based interface, XML-based configuration files, provider profiles and support of standard protocols make configuration extremely quick and easy. The DECT Multicell System is also compatible with other IP PBX systems and can be linked to IP Centrex providers. The N720 SPK PRO (Site Planning Kit) is recommended for the planning of large deployments. Business productivity With direct access to corporate and public online directories, managing contacts is easy – even while on the move. User can access online information and receive text messages via the email reader. Professional HD sound Exceptional HDSP[®];1,2 sound on the N720 DECT IP PRO adds business efficiency: superb and clear wideband audio technology makes calls sound like face-to-face meetings. Broad range of Gigaset handsets Select from a broad range of compatible Gigaset handsets tailored to your business needs – from elegant to ruggedized. High-quality and thorough testing ensure endurance for everyday use. Users benefit from the visually attractive user interfaces of the new generation of Gigaset handsets, brilliant sound and innovative features.
