All SN4970 models include Patton's SIP Survivability Suite which includes PSTN Fallback in the event of a network outage, SIP registrar allowing SIP clients to continue to make calls in the event of a network outage, and dial backup enabling dial-up connection to the PSTN during network and power outages.

The Patton SmartNode Gateway series is Microsoft Lync compatible.

Patton SmartNode 4970 30 VoIP Channels 4 Port T1/E1 PRI Failover Relay VoIP Gateway Features

าั¿½ 30 VoIP Channels — with up to four T1/E1/PRI ports and a single Gigabit Ethernet port. าั¿½ Upgradeable to 60 VoIP Channels

� Proven Interoperability—SIP interop with major IP PBX, Softswitch and VoIP Service Providers. Over 100,000 SmartNode deployments worldwide. ISDN/PSTN compliance in nearly every country.

Transparent Telephony Features— Complex number manipulation and mapping for seamless integration with existing infrastructures, CLIP, CLIR, hold, transfer and much more. Table Mounting Options— The device can be placed on a desktop or installed in a 19-inch rack using the optional rack ear kit (INS-KIT-RACKEARS-11/19)

VoIP-over-VPN with voice encryption provides secure voice and data via IPsec with AES/DES strong encryption and automated keying via Internet Key Exchange (IKE). In addition, advanced call-router functionality includes least-cost call routing with flexible dialed-number plan support. Patton SmartNode 4970 30 VoIP Channels 4 Port T1/E1 PRI Failover Relay VoIP Gateway offers a smooth transition to VoIP with strong number portability. This allows you to continue to make and receive calls via the PSTN while your SIP provider is in the sometimes long process of porting your numbers over to SIP. When your numbers are completely SIP based, the SN4970 will dynamically switch to SIP so the transition from POTS to VOIP is seamless and instant
