Epygi Quadro4L IP PBX Four FXO and Two FXS Ports

The Epygi Quadro4L was designed with those requirements as primary attributes and is the main focus of all Epygi solutions. No matter the size of the customer, a company needs a telephony product that will provide a premium level of service every day on every call. In addition to superb quality, the Quadro4L offers a wide range of features including unified messaging, auto attendant, call relay, call queuing, fax to email, life line port and key system emulation. Features & Benefits

• Key System Simplicity

• True IP Solution

• Turn-key Installation

• No Expensive Licenses

• IP phones: 16 PBX Mode

• IP phones: 12 Key System Mode

• Add'l IP phones up to 24 in IP PBX Mode with key

• Concurrent Calls: 16

The Quadro4L is equipped with four (4) FXO ports to connect to the PSTN and two (2) FXS ports for analog phones or fax machines. Additionally included is SIP trunking, so the Quadro4L can connect directly to an Internet Telephony Service Provider (ITSP) at no additional cost. IP phones can also be registered directly with the IP PBX supporting up to 24 IP phones. These phones can either be manually connected or automatically configured by the Quadro4L. In key system mode, up to 12 IP phones can be used. Legacy Phone System Replacement Epygi designed the Quadro4L for deployment right out of the box as a turn-key solution. Using advanced plug-and-play for IP phones, multiple FXO ports for PSTN access and two FXS ports, this IP PBX functions as a traditional PBX or key system. As a bonus, Epygi delivers features not found on traditional key systems. Business enhancements include after-hours auto attendant and unified messaging, among many others. Effortless Administration Sophisticated auto-recognition and auto-configuration capabilities between the Quadro4L and certified IP phones simplify installation and operation. The administrator can modify automatic assignments through the Graphical User Interface. Also integrated into the Quadro4L is a fully featured router, DHCP and firewall with intrusion detection and prevention. Therefore, a complete small business network can be managed by a single device. Note: Please refer to the Epygi IP PBX Range Detailed Comparison Table for more information.
