- Relays controlled individually by DTMF tones SIP Protocol

Usage scenarios

They can be deployed as:

- Office door phone with on-site or hosted IP-PBX, full access control
- Remote site entry over Internet
- Apartment/flat intercom with door access control

Name holders are back lit in original blue colour for easy identification even in poor lighting conditions. The front plate is made in anodised extruded aluminium. The IP Bell can be registered as an extension to any SIP based phone system. Callers at your door can talk to you whether you are on site or not. The camera option shows real-time video on either a computer or a SIP video telephone. To avoid wiring, the IP Bell can interface with a WiFi. The Alphatech Farfisa IP Bell 01C with 1 push button and a camera, VoIP SIP video 220201 consists of a camera door phone unit designed to sit on the outside of your premises plus 1 button. The Alphatech Farfisa IP Bell 01C with 1 push button and a camera, VoIP SIP video 220201 is slimline with a depth of just 30mm.
