CyberData VoIP Remote Call Button - RAL 9003 White 011185

Please Note: This product may have a lead time of up to 1-2 weeks. Please call 0330 088 0195 and speak to our sales team who can confirm the current available stock for your requirement

As an option to the SIP Talkback speaker, the CyberData VoIP Remote Call Button - RAL 9003 White 011185 enables calls to the Talkback Speaker that can be initiated or answered from a remotely-mounted switch.  When enabled through the Web interface, if the Remote Call Button is pressed, the speaker would initiate a SIP call to a predetermined extension.  When the Talkback Speaker is called from a remote phone and Auto-Answer is not enabled within the unit&rsquo;s Web interface, the LED on the Remote Button will blink. The call will be answered when the button is pressed.
