Alternative Siemens phones can be found [here](#)

The Siemens Gigaset S45 DECT IP phone is a dual mode phone system which allows DECT phones to make VoIP call over an Internet connection, or land line calls over a fixed line connection (such as a BT phone line). One VoIP call and one fixed line call can be terminated at the same time with multiple handsets.

Please note the Siemens S45 requires a Siemens Gigaset S450IP.
