DISCONTINUED

## Cyberdata Door Strike Relay Module (011269) - DISCONTINUED

Product Name: Cyberdata Door Strike Relay Module (011269) - DISCONTINUED

Manufacturer: CyberData

Model Number: 011269

Cyberdata Door Strike Relay Module (011269)

The CyberData Door Strike Relay module (011269) eliminates the need for the customer to source a separate relay and makes wiring an electronic door strike easier.

Cyberdata Door Strike Relay Module (011269) Key Features

- Direct connection to CyberData Intercom products
- 4 wire interface
- 12 Amp relay
- NO/NC contacts
- Opto-isolated sense input
- Power is provided from relay voltage
- Wall mounting
- Cable strain relief
- Lock status LED

When connecting a CyberData Intercom to an electronic door lock, the high current side of the door strike requires a separately-wired relay and protection diode.

Cyberdata Door Strike Relay Module (011269) - Technical Specifications

General

- Power Input 5V to 60V DC / 9V to 250V AC
- Operating Temp -10° C to 50° C (14° F to 122° F)
- Maximum distance from Intercom 50 feet
- Dimensions 6.000" x 3.570" x 1.575"
- Warranty 24 months
- Boxed Weight 2.0 lbs.
- Part Number 011269
