2N Helios Standard electrical lock with hold-open function - 932080E

The 2N Helios Standard electrical lock with hold-open function - 932080E is an electrically-triggered, high security door lock featuring hold-open function. The 2N Helios Standard electrical lock with hold-open function - 932080 is opened by 12v supply, but will stay open until the door is closed again. This allows a visitor to communicate with a specific resident or (for example) with a remote security office, who can trigger the locking mechanism via an IP device connected to the same network, such as an IP telephone.

ï¿½ Electrically-triggered door lock

ï¿½ Compatible with the 2N Helios range of Door Entry systems

ï¿½ High quality, secure lock mechanism
