

Cyberdata Desktop VolP Speaker

Product Name: Cyberdata Desktop VoIP Speaker

Manufacturer: -Model Number: -

Cyberdata Desktop VoIP Speaker

The CyberData Desktop Speaker is small footprint Power over Ethernet (PoE)-powered notification device that fits easliy onto a desk or table. The CyberData Desktop Speaker has a built-in Gigabit switch that enables a single network connection to a cubical or a desk to be used to communicate to both to the Desktop Speaker and a second network device (like a VoIP phone or computer). A web-based configuration page allows easy setup as a SIP endpoint and/or a Multicast listening device. In addition, a second SIP endpoint can be configured to play a user-uploadable audio file when called for use as a night ringer.

Cyberdata Desktop VoIP Speaker Key Features

- i¿½ PoE 802.3af enabled (Powered-over-Ethernet)
- ï¿⅓ SIP compliant
- ï¿⅓ One Port 10/100/1000 switch
- � Network web management
- ï¿1/2 Network volume control
- ï¿⅓ Multicast support
- � Network downloadable firmware
- � Doubles as a paging speaker
- � Cisco SRST support
- � Multi button 2 way intercom option

Cyberdata Desktop VoIP Speaker - Technical Specifications Typical Applications

- ï¿⅓ Selective paging
- ï¿⅓ Mass notifications
- � Company announcements

Typical Applications

- ï¿1/2 Ethernet I/F: 802.3af 10/100/1000
- ï¿1/2 Protocol: SIP RFC 3261 Compatible
- าั¿½ Power Input: PoE 802.3af compliant or +5 volts at 1000mA
- آذ% Operating Temperature: -10 degrees C to 50 degrees C (14 degrees F to 122 degrees F)
- � Payload Types: G711 A-Law and u-Law
- i¿½ Regulatory Compliance: FCC Class A, UL 60950
- تزر Warranty: 2 Year Limited
