2N IP Verso 5 button module (9155035)

The 2N IP Verso 5 button module is a 5-Button Module features 5 x Backlit Mechanical Buttons to increase the number of Quick-call zones on your Verso Device.

Each Quick-call button is backlit with clear, white LEDs and has space for changeable name tags.

The Verso 9155035 5-Button Module can be used either within the same Frame as the Verso base units, individually in its own Frame or with other Additional Function Modules in a multiple-Module Frame.

Using multiple Verso Frames and multiple 5-Button Modules, a maximum bank of up to 146 Buttons can be connected together in a zone.
