

## Yealink EXP20 IP Phone Expansion Module

Product Name: Yealink EXP20 IP Phone Expansion Module

Manufacturer: Yealink

Model Number: EXP20

### Yealink EXP20 IP Phone Expansion Module

The Yealink EXP20 is an excellent companion to Yealink's popular SIP-T29G and SIP-T27G advanced IP phone models. The EXP20 is simple and comfortable to use with a 160x320 liquid crystal display (LCD) interface and an assorted range of LCD-accessible icons.

#### Yealink EXP20 Key Features

- Compatible with Yealink's T29G, and T27G devices
- A diverse range of actionable, LCD-accessible icons
- 160x320 graphic LCD with backlight
- 20 physical, dual-color LED programmable keys
- 18 additional keys available
- Supports up to six modules
- Two accessible pages
- Stand with two adjustable angles
- Two or less expansion modules can be powered by the host phone

The additional screen space and added number of buttons simplifies user navigation and streamlines essential operational functions such as speed dial, BLF, BLA, call forwarding, transfer and hold. Up to six EXP20 phone systems can be strung together on a single daisy chain. The advanced new Yealink EXP20 is an ideal IP phone system for receptionists, administrative assistants or contact center workers who need to monitor and manage a large volume of calls on a regular basis.
