Patton SmartNode SN4112S/JS/EUI 2 port FXS Analogue Gateway
The Patton SmartNode SN4112S/JS/EUI, with its FXS analog ports, connects to any legacy telephone or PBX and provides dial-tone, ringing, and caller-ID. When equipped with FXO ports, the local PSTN can be accessed enabling local calling and enhanced toll-bypass applications while using a single connected telephone.
Patton SmartNode SN4112S/JS/EUI Key Features

ï¿½ Up to 8 FXS and/or FXO ports
ï¿½ Advanced Local Call Switching
ï¿½ Complete SIP and T.38 support
ï¿½ Easy Management & Provisioning
ï¿½ Outstanding Interoperability
ï¿½ Supported by SmartNode™ Redirection Service

Flexible call integration allows per-port telephone numbers, programmable call progress tones, and distinctive ringing. With Telephony-over-IP (ToIP) call switching, calls can automatically select the least-cost-route while providing flexible numbering plans and end-to-end feature transparency. PPPoE, DHCP, and VLAN offers universal IP connectivity and optional IPsec VPN with AES/3DES guarantees secure voice over the public network.
