

Sangoma NetBorder SS7G-FLEX-3232 Flex Gateway 32 T1/E1 License, Transcoding, 1U, Dual AC

Sangoma NetBorder SS7G-FLEX-3232 Flex Gateway 32 T1/E1 License, Transcoding, 1U, Dual AC

Product Name: Sangoma NetBorder SS7G-FLEX-3232 Flex Gateway 32 T1/E1 License, Transcoding, 1U, Dual

AC

Manufacturer: Sangoma

Model Number: SS7G-FLEX-3232

Sangoma NetBorder SS7G-FLEX-3232 Flex Gateway 32 T1/E1 License, Transcoding, 1U, Dual AC

The Sangoma NetBorder SS7G-FLEX-3232 Flex Gateway 32 T1/E1 License, Transcoding, 1U, Dual AC is ideal for applications such as connecting a private branch exchange to the legacy telephone network or providing multiple points of presence to a VoIP network.Sangoma NetBorder SS7G-FLEX-3232 Features

� Connect calls between PSTN and VoIP networks

ï¿1/2 32 T1/E1 License

ï¿⅓ Dual AC

ī¿½ Integrated media gateway, signalling gateway and media gateway controller

� Compatible with distributed architecture

ī¿½ Scalable, carrier-gradeHighly interoperable with other system types

آذِيً Supports a wide range of codecs for VoIP, PSTN and wireless

آذًا Supports a wide range of SS7 and VoIP signalling protocols

ï¿⅓ Sophisticated call routing

The Sangoma NetBorder SS7G-FLEX-3232 provides full call control routing for SS7 traffic without the need for third party media gateway controllers or protocol converters. Full inter-working is supported across all VoIP and TDM protocols simultaneously, allowing this single multi-protocol TDM to VOIP gateway to be deployed interconnecting differing networks. The compact, all-in-one design reduces footprint and eliminates the need to source multiple network components to handle media, signalling and routing. SIGTRAN and MEGACO allows a distributed solution across multiple points of presence where SS7 Interconnect is required. SNMP & DI provides convenient access to most configuration, monitoring and management functions, while a command line interface provides full access to management functions with a minimum of bandwidth consumption.

Price: £22,742.20
